LAWSON

Lawson Requisitions Self-Service

- Web-based user interface, with familiar shopping look and feel

- Shopping Lists for frequently ordered items

- Ability to request off-catalog items and services

- Electronic approvals

- Self-service receiving

- Integration with Lawson Procurement and Procurement Punchout

Benefits: Eliminates manual, paper-based requisitioning by providing web-based, end-user, template based requisitioning and workflow approval, leading to faster order cycle times, increased standardization, and reduced costs.

LAWSON

Lawson Procurement Punchout

- Seamlessly browse from Lawson Requisitions Self-Service to vendor web sites

- Select from approved products and pre-negotiated prices

- Create standard requisitions in Requisitions Self-Service

- Process approvals through RSS, RQ or ProcessFlow

- Generate and transmit purchase orders via cXML, fax, e-mail, or EDI

Benefits: Eliminates the need to maintain item master records, enhances spend analysis and works with your existing Lawson requisition and purchase order processes
